COVER LETTER:

Dear Hiring Manager,

I am writing to express my interest in the post advertised at your company. I have been fascinated by computers since I was 10 years old and have developed a strong interest in software development over the years. My first experience with programming was using QBASIC on a 386 MS-DOS machine, and by the age of 11, I had written my first program.

I have over two decades of experience in the IT field, including hardware repair, software development, end-user support, graphic design, and management. I am currently employed by the South African Government as an IT Engineer and Web Developer, and also work as a freelance developer part-time. My skills and experience in various areas of IT make me confident that I can bring value to your company. My references will attest to my resourcefulness and problem-solving abilities, which make me a valuable asset to any team.

In my free time, I enjoy spending time with my family, playing guitar, watching professional skateboarding, playing chess, and exploring new technologies such as graphic design, digital marketing, and block chain development. I am currently working on an NFT project to honour the late Nelson Mandela.

I would be honoured to join your team and contribute my skills and experience to help achieve your company's goals. I look forward to hearing from you and thank you for your consideration.

Sincerely,
Andre van Rensburg

ANDRE VAN RENSBURG
Web Developer / I.T Engineer
